

APPLE TREE DAY NURSERY

TOILET TRAINING

At Apple Tree Day Nursery staff actively encourage parents to toilet/potty train their child. Staff provide support and advice through the process of potty/toilet training. If staff members or parents feel that their child is ready to start the transition of toilet/potty training then both Keyworker and parent/carer will meet to discuss the child's individual needs and together will make a date for toilet/potty training to begin. Daily communication will take place between nursery staff and the parent/carer to update on the child's progress. This is carried out verbally and also via the daily record sheet. Support and advice is given to the parent/carer and child as required.

So that all staff members are aware of toilet training, the child's Keyworker will ensure that the child is given regular opportunities to use the potty/toilet throughout the session promoting independence. Successes will be celebrated and accidents sensitively handled.
